SUMMARY

Computer Science undergraduate pursuing a B.Tech in Computer Science Engineering and a BS in Data Science at IIT Madras. Proficient in Java, Python, JavaScript, SQL, and full-stack development using React, Node.js, Express.js, and MongoDB. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Management Systems, and Computer Networks. Passionate about building scalable software solutions and solving complex engineering problems through clean, efficient code.

EDUCATION

- **B.Tech in Computer Science Engineering, BVRIT Hyderabad College of Engineering for Women:** CGPA: 8.75 2023–2027
- **BS in Data Science, Indian Institute of Technology Madras:** CGPA: 7.4 2023–Present
- **Intermediate, Resonance Junior College:** GPA: 9.3 2021–2023

TECHNICAL SKILLS

- **Languages:** Java, Python, C, JavaScript, SQL
- **Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks, Software Engineering
- **Web Technologies:** React.js, Node.js, Express.js, HTML5, CSS3, REST APIs, JWT Authentication
- **Databases:** MongoDB, MySQL, SQLite
- **Tools:** Git, GitHub, VS Code, Postman, Power BI, Tableau, Excel, LaTeX

PROJECTS

- **Placement Portal Application (IIT Madras BS Degree Project) (GitHub):** Developed a full-stack placement portal using **React.js, Node.js, Express.js, and MongoDB** with role-based authentication, job postings, application tracking, resume uploads, and dashboards for students, recruiters, and administrators. Designed RESTful APIs, implemented secure JWT authentication, and built responsive user interfaces following modular software design principles.
- **To-Do List Application (GitHub):** Built a full-stack MERN task management application implementing **JWT authentication**, CRUD operations, REST APIs, task prioritization, filtering, search functionality, and responsive user interfaces while following clean and maintainable coding practices.
- **Tranquilink (Smart India Hackathon Round 1 Qualifier) (GitHub):** Designed and developed a web-based mental wellness platform featuring mood tracking, anonymous peer support, and personalized wellness resources. Collaborated within a multidisciplinary team to deliver an innovative solution during the Smart India Hackathon.
- **Healthcare Analytics Dashboard (GitHub):** Developed a healthcare analytics dashboard using **Python, SQL, and Power BI** to clean, analyze, and visualize CBIS-DDSM mammography data, enabling interactive dashboards and data-driven healthcare insights.

INTERNSHIPS

- **Research Intern – IIT Hyderabad:**
- **Research Intern – IIT Hyderabad:** Working on privacy-preserving breast density classification using distributed mammography datasets. Fine-tuning pre-trained **Vision-Language Models (VLMs)** and evaluating federated learning approaches while developing Python pipelines for data preprocessing, experimentation, and model evaluation.

CERTIFICATIONS & ACHIEVEMENTS

- **Certifications:** HackerRank SQL (Intermediate), Hackerrank Python, Azure DevOps Fundamentals, Udemy- Full Stack Web Development, IIT Madras BS Degree Foundation certificate
- **Achievements:** Smart India Hackathon Round 1 Qualifier, Adobe India Hackathon Round 1 Qualifier, Flipkart GRID 8.0 – Advanced to Round 3

ADDITIONAL INFORMATION

Languages: English, Telugu, Hindi, French

Soft Skills: Problem Solving, Communication, Collaboration, Leadership, Adaptability

Extracurricular Activities: Black Belt in Karate (National Gold Medalist – KATA), CSI Student Chapter Member, Volunteered in Blood Donation Camp (NSS)
